# The Job Mitra Advantage: Why Choose Us?

### Time-Saving Solutions

Our intuitive interface and smart features drastically reduce the time spent on recruitment.

### User-Friendly Experience

Designed with simplicity in mind, our platform ensures a smooth journey for both parties.

### Expanded Reach

Connect with a wider talent pool or a greater variety of job opportunities than ever before.
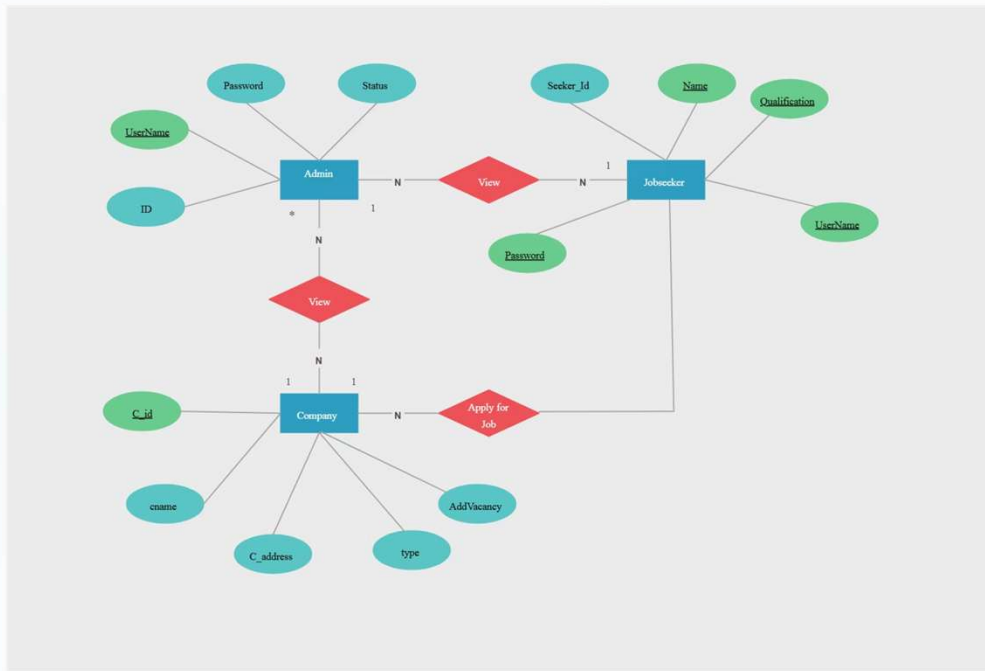

# Searching Algorithm

A searching algorithm is used to find data from a data structure. In this project, we use the **linear search algorithm**. Linear search works by checking each element one by one until the required value is found or the list ends. We use this algorithm to help applicants search for jobs based on their interests. When an applicant enters their search input, the system shows a list of matching job results.

# ER Diagram:

An ER diagram is used in this project to represent the database structure and the relationship between entities such as User, Job, Application, and Company.
